PORTFOLIO

Product portfolio at a glance

A concise view of the principal material categories MPH can source and coordinate for international buyers.

FLAT STEEL

- Hot Rolled Steel (HR/HRPO)
- Cold Rolled Steel (CR)

COATED STEEL

- Electro Galvanized (EG)
- Galvanized Steel (GI)
- Hot Dip Galvanized (HDG)
- Galvalume Steel (GA)
- Galvanneal Steel (GL)

PRE-PAINTED

- PPGI • PPGL
- Colour-coated coils
- Roofing & cladding supply

SPECIALTY STEEL

- Tinplate
- Electrical / silicon steel
- Stainless steel

INDUSTRIAL MATERIALS

- Aluminium
- Steel billets
- Shipbuilding / heavy engineering

SUPPLY OPTIONS

- Prime • Surplus
- Overrolled
- Secondary / commercial grade

Specifications, grades and dimensions are supplied subject to buyer requirements, source availability and commercial confirmation.

FLAT STEEL

Hot rolled, pickled & cold rolled products

Coils, sheets and slit coils sourced according to application, specification and commercial requirements.

Hot Rolled Steel

- General Fabrication
- Structural & industrial use

HRPO

- Pickled & oiled
- Cleaner surface
- Processing & fabrication

Cold Rolled Steel

- Better finish
- Appliance & manufacturing

Typical RFQ Parameters

- Grade / standard, thickness and width
- Coil, sheet or slit coil requirement
- Surface condition, hardness or temper if applicable
- Quantity, destination port and delivery period

Available forms and tolerances depend on source, material category and buyer confirmation.

COATED STEEL

Metallic coated steel products

Electro-galvanised, galvanised, galvannealed and aluminium-zinc coated materials for manufacturing and construction-linked applications.

EG

Electro-galvanised steel for precise surface and forming requirements.

GI/HDG

Hot-dip galvanised steel for corrosion-resistant applications.

GA

Galvannealed steel for painted or further processed components.

GL

Aluminium-zinc coated steel for roofing, cladding and related uses.

Key Parameters

Coating mass • Spangle / surface • Passivation or oiling • Thickness • Width • Packing

METRO PREMIUM HOLDINGS

PRE-PAINTED & SPECIALTY

Colour-coated and application-specific steel

Materials selected for appearance, performance, forming requirements and end-use environment.

PPGI / PPGL

Pre-painted galvanised or aluminium-zinc coated coils for roofing, cladding and fabrication.

Tinplate

Packaging, containers and selected industrial applications subject to source availability.

Electrical / Silicon Steel

Specialised steel for electrical and transformer-related applications where available.

Selection Factors

Substrate, paint system, colour, finish, tolerance, coating and end-use requirement.

PRE-PAINTED & SPECIALTY

Broader supply possibilities beyond flat steel

MPH can coordinate selected ferrous and non-ferrous materials through approved sources and project-based requirements.

Stainless Steel	Coils • sheets • selected grades
Aluminium	Ingots • coils • industrial supply where available
Semi Finished Steel	Billets and feedstock for downstream processing
Shipbuilding / Heavy engineering	Plates and material for marine and industrial use

Each enquiry is reviewed against specification, source credibility, documentation and logistics feasibility.

METRO PREMIUM HOLDINGS

SUPPLY OPTIONS

Flexible sourcing models for different buyer needs

MPH can support conventional prime material requirements as well as surplus and commercial grade opportunities where suitable.

Prime Material

Material produced and supplied against specified standards and buyer requirements.

Prime Excess / Surplus

Excess production, cancelled orders or surplus inventory subject to available documentation.

Overrolled Material

Material originating from production exceeding original order requirements, offered subject to inspection and confirmation.

Secondary / Commercial Grade

Economical material options supplied subject to condition, acceptance and commercial suitability.

Final offer is always subject to origin, quantity, specification, inspection, documentation and payment terms.

QUALITY & DOCUMENTATION

Practical checks before commitment

The brochure should communicate disciplined transaction handling without over-promising documentation that may vary by material category.

Specification Review	Material Documentation	Inspection Support	Packing & Logistics	Traceability Review
Buyer requirements are checked before sourcing or offer preparation.	MTC / mill documentation where available and applicable.	Visual, dimensional or third-party inspection can be arranged by requirement.	Packing, containerisation, shipment and delivery requirements are coordinated.	Origin and supporting documentation are reviewed based on source records.

Documentation availability may vary depending on material category, source and transaction structure.

METRO PREMIUM HOLDINGS

REQUEST FOR QUOTATION

How to send your requirement

A complete RFQ helps us evaluate availability, technical suitability, logistics and commercial terms faster.

Please provide:

- Product
- Grade / Standard
- Thickness
- Width
- Coil / Sheet requirement
- Quantity
- Coating requirement
- Hardness / temper
- Preferred origin
- Destination port
- Required delivery period
- Inspection requirement
- Payment terms
